Mr. Niemyski open the public hearing at 7:45 PM. Mr. Bruce D. Ringwall, P.E., of Goldsmith, Prest & Ringwall, Inc., on behalf of the owners and applicants, Guido and Helene Gagliano, described the plan: 2-lot subdivision on +/-2.7 acres with a 590-foot long private road; hoping to keep disturbances to a minimum except for house site; hoping to use existing driveway as is except for a new turnaround near the houses. Mr. Ringwall addressed the departmental comments. Concerning the sidewalk requirement, he will estimate the cost of constructing in the suggested locations. Concerning the driveway slope at Washington Drive, he presented a plan showing the extent of cuts and tree removals that would be necessary to lessen the grade. He also noted that the Board of health has approved the septic disposal plans.

Ruth Martin, Planning Board member assigned to the application, stated that she had visited the site. She noted the need for adequate vehicular turnaround and maneuvering space, and the need to preserve the many mature trees on the site. Other Board members questioned the applicant on site clearing, driveway maintenance, and the proposed turnaround.

Abutters in attendance raised questions and concerns regarding:

- Why not access the one lot from Monroe Drive where it 50 feet frontage? Applicant: Monroe Drive is a private way. Once accepted as a public way, they intend to access from it. They intend to wait until street acceptance of Monroe Drive has occurred.
- The drive begins very steeply at Washington Drive. Sometimes vehicles can't get up in winter. Applicant: Acknowledged the challenge. Timely plowing and sanding is paramount.

- Drainage from lot and new septic system affecting abutters. Applicant: The land receives runoff from the abutting lot in the rear. This and runoff from the new lot will be channeled around the new septic system via a water quality swale towards a wooded discharge area on applicant's land. There will no runoff discharge onto abutters' lands.
- Stonewall near Washington Drive. Applicant: It will be preserved in its present condition.
